

# Blank space? Autofill it with AI.

AI outpainting extends your photo to cover the whole case — no cropping, no stretching. Here's the 30-second fix, straight from the designer.

## From warning to five stars, in four taps

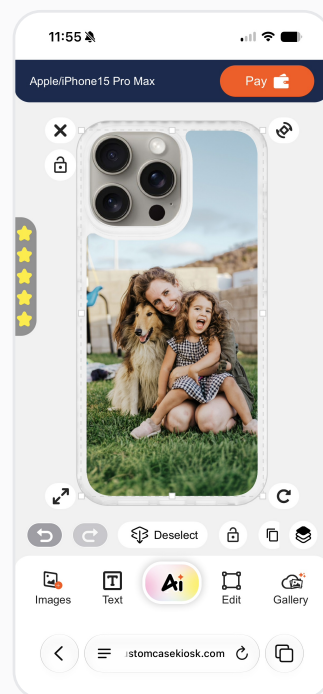

**1 Spot the warning**  
Blank space around your photo flags “Image not filled” — and costs you a star.

**2 Tap your photo, then AI**  
The AI menu opens. Choose AI outpainting — the expand option on the left.

**3 Let it generate**  
The AI extends your photo to fill the case. It only takes a few seconds.

**4 Edge to edge, five stars**  
Warning gone, full score. Tap Pay and your case prints in minutes.

### While you're in the AI menu

- Portrait Cutout lifts a person off the background; AI Cartoon restyles the whole photo — same menu.
- Not loving the result? Tap undo and run it again for a fresh take.
- Autofill works best when your photo already covers most of the case.
