

Make it yours with custom text.

Names, dates, inside jokes — the Text tool puts them right on the case. Front: style your text. Flip over: save and place it.

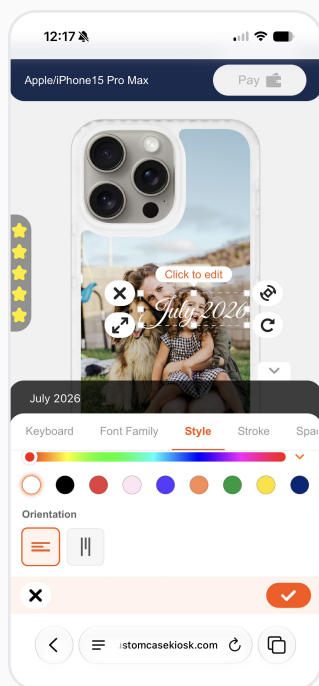

Style it — the text editor's tabs, left to right

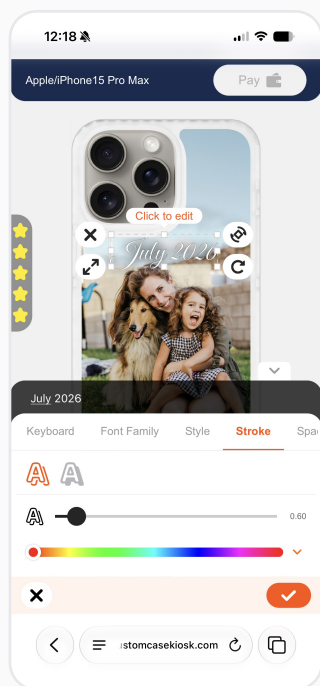

1 Tap Text, type away
The T icon drops a text block. Type your message on the Keyboard tab.

2 Pick a font
Font Family has scripts, serifs, and display faces. Tap one to preview it live.

3 Choose a color
Style tab: quick swatches or the full spectrum. Vertical orientation lives here too.

4 Add stroke or shadow
Outline or drop shadow with its own width and color — it makes text pop off busy photos.

Font picks that print great

- Script fonts (like Great Vibes) love short text — a name or a date. Long sentences want a simpler face.
- White text with a thin dark stroke stays readable on almost any photo.
- Match the font to the moment — Great Vibes for anniversaries, Creepster for Halloween.

Save it, then place it.

The orange checkmark locks in your text — then drag it anywhere or align it exactly.

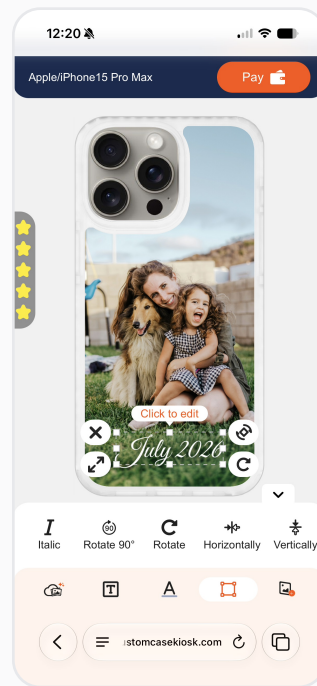

Finish it — spacing, save, position

5 Dial in the spacing
The Spacing tab has letter-spacing and line-spacing sliders. Small nudges go a long way.

6 Save with the orange check
Tap the orange checkmark to keep your changes — the X throws them away.

7 Align it exactly
Edit tab: center Horizontally or Vertically, rotate, or italicize for precise placement.

8 Or just drag it
Drag with a finger to reposition; pull the corner arrows to scale. That's the whole move.

Placement that works

- Park text on a calm part of the photo — grass, sky, a wall — not across faces.
- Eyeballing is fine, but Horizontally + Vertically on the Edit tab is pixel-perfect.
- Tap the text again anytime to reopen the editor and tweak it.
