

# Design a case you'll love.

Everything happens on your phone — the kiosk kicks things off and prints at the end.

No app, no login

Ready in ~3 minutes

Designed by you

## Six steps, start to finish

1

### Scan the QR to start

Point your camera at the QR code on the kiosk and tap the link. The case designer opens right in your browser.

2

### Pick your phone model

Apple, Samsung, or Google — then your exact model. The print area is shaped to fit it, camera cutout included.

3

### Choose a case finish

Clear finishes show your phone's color through; tinted finishes set the mood. Styles vary by kiosk.

4

### Design your case

Add photos, text, stickers, and backgrounds. Built-in AI can expand an image, stylize it, or cut out the subject.

5

### Check your score

Five stars on the left edge rate how your design will print. 80+ prints great — it's a check, not a gate.

6

### Pay and pick up

Tap Pay, finish payment on the kiosk screen, and stay close. Your case lands in the pickup compartment minutes later.

## Photo tips

- Camera originals beat screenshots — compression shows in print.
- Bright, even lighting wins.
- Vertical or square photos fit the case; wide shots lose a lot to cropping.
- Pets, bold patterns, and one clear subject always work.
- Can't choose one pic? Try a collage layout from the frames gallery.

## Good to know

- Blank white space left over? Tap AI and choose AI outpainting to autofill the whole print area.
- Phantom 3 cases are 20-ft drop tested and carry a lifetime warranty.
- No accounts, no signups, no apps — the designer runs in your browser.
