

Scan. Pick. Design.

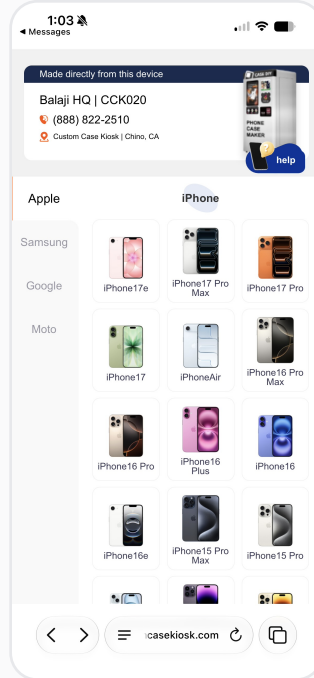

The first minute at the kiosk — from the QR code on the screen to a blank canvas shaped exactly for your phone.

Four taps before the fun part

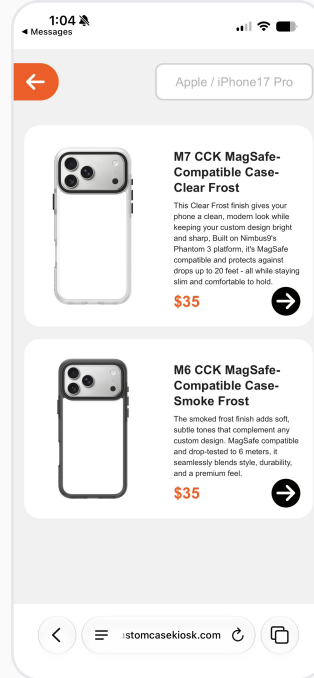

1 Scan the QR on the kiosk

Point your phone camera at the kiosk screen and tap the link. No app, no login — it opens in your browser.

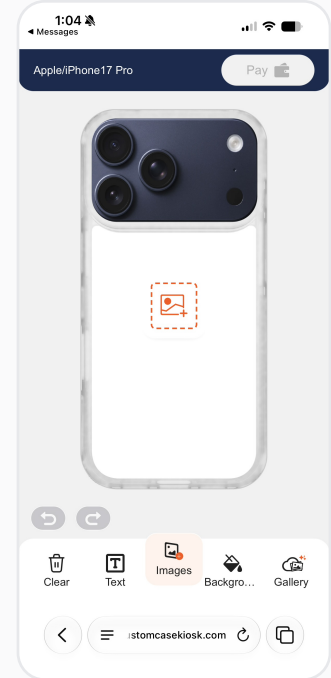

2 Pick your phone model

Tap your brand — Apple, Samsung, Google, or Moto — then your exact model, so the print fits perfectly.

3 Choose your finish

Clear Frost keeps your design bright and clean; Smoke Frost adds soft, smoky depth. Tap the arrow to continue.

4 You're in — start designing

A blank canvas opens, shaped for your phone. Add photos, text, or start from a gallery template.

Finish facts

- Availability varies by phone model — many models offer both finishes, some carry one.
- Both finishes are MagSafe-compatible and drop-protected to about 20 feet.
- Not sure? Clear Frost flatters bright, colorful designs; Smoke Frost loves darker, moodier ones.
